

To Whom It May Concern:

I have recently learned that FCC rules concerning Low Power FM (LPFM) may affect the K-LOVE FM station that I listen to in my area. I implore the FCC to leave the LPFM rules as they are in order to allow K-LOVE and stations like them to stay on the air. K-LOVE is a station that I, my wife, and my four children all listen to everyday. The music is wholesome and enjoyable and the news stories are uniquely presented. I had waited for twenty years for a station like K-LOVE to come to the Memphis, TN area. I had moved to Memphis from Seattle (in 1984). Washington did have a K-LOVE type station and Memphis did not. Forcing K-LOVE off the air in Memphis would leave a gap in the type of programming that I, and many citizens like me, love. I believe in non-profit K-LOVE so much that I contribute \$960 per year for its operation. That is a lot from a single income family. Thank you for the time to consider my comments.
